

has anyone looked at their phone bills? has anyone looked at their cellular phone bills? well folks we are being sucked dry by a bunch of people that think once they adopt a plan better known as the telecommunications act of 1996. yes, it was to adopt to help out but what they didn;t tell you is once we put all these taxes on your phone bill we will suck you dry. are you tired of it I am. when is enough enough? I don;t have a problem helping out and paying, but when they keep thinking they can just increase,,, increase and we have no say it has to stop, I hope the fcc will get their head out of their butts thanks, Ronnie Peterson
